LinkedIn | Github

Full Stack Web Developer with a background in Operations and Management. Aims to apply proven leadership and organizational skills to the development of web applications. Strengths in Javascript and Node.js.

Technical Skills

- HTML5, CSS3, Javascript, jQuery, Node.js, Express.js, Firebase, Handlebars, Bootstrap, and MySQL.

Projects

Moodlist | Javascript, jQuery, Firebase | **Github** | **Live**   **Full Stack Developer**

Web app that renders a music playlist to fit the user's current mood.

- Integrates Spotify API and Open Weather Map API.
- Dynamically renders a playlist based on the user's mood.
- Utilizes the following to create a sleek UI: HTML/CSS, Materialize, and Favicons.

Bamazon | Node.js, Express.js, MySQL | **Github**   **Full Stack Developer**

Node app that allows users to view/buy items and managers to update their inventory.

- Connects to a MySQL database using Express.js.
- Automatically updates the MySQL database to reflect changes made through the terminal.
- Incorporates Inquirer to prompt the user and Easy-Table to display information.

Liri-Bot | Node.js, Axios, Moment.js | **Github**   **Full Stack Developer**

Node app that displays concert, movie, and song information based on user input.

- Utilizes Spotify API, Bands In Town API, and OMDB API.
- Integrates Axios to retrieve information from the API's for each user command.
- Uses Moment.js to format upcoming concert dates.
